

Here is the output that I got from the terminal when I provided the below command:

1. Docker Container ls:

CONTAINER ID	IMAGE	COMMAND	CREATED	STATUS	PORTS	NAMES
518da793ccd2	samundra-service1-image	"python service1.py"	6 seconds ago	Up 5 seconds	80/tcp	samundra-service1-container
d335af691292	samundra-service2-image	"docker-entrypoint.s..."	7 seconds ago	Up 6 seconds	8000/tcp	samundra-service2-container

2. Docker network ls:

NETWORK ID	NAME	DRIVER	SCOPE
65ba615781c1	assignment1_default	bridge	local
40b5968fecc3	assignment1_mynetwork	bridge	local
1c49733be155	bridge	bridge	local
ecb386a06517	host	host	local
8da48449132e	none	null	local
